

| Final Project Demonstration/ Viva evaluation Rubric   |                                                                                                                       |                                                                                   |                                                                               |                                                                             |                                                                   |          |  |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------|-----------------------------------------------------------------------------|-------------------------------------------------------------------|----------|--|
| Criteria                                              | 5 Pts                                                                                                                 | 4 Pts                                                                             | 3 Pts                                                                         | 2 Pts                                                                       | 1 Pts                                                             | 0 Pts    |  |
| <b>Project Design</b>                                 | Demonstrate an advanced understanding of design requirements and propose additional design solutions and constraints. | Clear understanding of design requirements and explore different design solutions | Clear understanding of design requirements and explore some design solutions  | Fair understanding of design requirements and explore some design solutions | Poor understanding of design requirements and no design solutions | No marks |  |
| <b>Assembling hardware</b>                            | Components are assembled safely & correctly with understanding of proper technology                                   | Components are assembled safely & correctly                                       | Components are assembled but not safely & correctly                           | Components are assembled but inaccurate/ not correct.                       | Construction is incomplete                                        | No marks |  |
| <b>Algorithm requirement/ code design</b>             | Implement a creative Code /Solution in the practical design. Displays with high level of techniques by industry.      | Clear evaluation and justification provided for final solution.                   | Code/ Solution is basically meet the design requirements                      | Explore limited code/ design solutions but not implemented                  | No code/ design solutions proposed or implemented                 | No marks |  |
| <b>Signal Processing Skills (Sensor's technology)</b> | Successfully use the sensors in the design with sophisticate signal processing approaches                             | Evaluate and select effective signal processing approaches in the design          | Basic knowledge of the sensors and sensors used in the project and working.   | Limited knowledge of the sensors and sensors used but not working.          | Little knowledge of the sensors and not used sensors.             | No marks |  |
| <b>Testing</b>                                        | Project tested in different conditions. Modifications made to optimize performance                                    | Project tested. Various modifications implemented.                                | Project tested & modified where required                                      | Project tested but no any modifications                                     | Project not tested                                                | No marks |  |
| <b>Demonstration/ viva Answer for Question</b>        | Well prepared and demonstrate clearly/ Answer for all questions.                                                      | Prepared and demonstrate clearly/ Answer for question.                            | Prepared for some parts and demonstrate clearly/ No answer for some question. | Unprepared and does not demonstrate clearly/ No answer for questions.       | Absent for demonstrate                                            | No marks |  |
| Total Marks (5 x 6 = 30)                              |                                                                                                                       |                                                                                   |                                                                               |                                                                             |                                                                   |          |  |
